SAP ABAP — Technical / Developer Track

Deep technical SAP development program

DURATION	PROGRAM TRACK
~13.5 weeks	SAP Skills

COURSE OVERVIEW

learners pursuing an SAP technical developer pathway.

WHAT YOU WILL LEARN

• ABAP programming and Data Dictionary.

• Reports, ALV and dialog programming.

• Enhancements, BAdIs and OO ABAP.

• BAPIs/RFCs and data-transfer techniques.

• Fiori/UI5, OData, debugging and performance analysis.

MODULE-WISE CURRICULUM

MODULE	TOPICS / LEARNING FOCUS	DURATION
1	ABAP Fundamentals — data types, internal tables, Data Dictionary	2 weeks
2	Reports Programming — classical/interactive reports, ALV	1.5 weeks
3	Dialog Programming — module pool, screen painter, transactions	1.5 weeks
4	Enhancements & Modifications — exits, BAdIs	1.5 weeks
5	Object-Oriented ABAP	1.5 weeks
6	Function Modules, BAPIs & RFCs	1 week
7	Data Transfer — BDC, LSMW, IDocs, BAPI loads	1 week
8	Fiori/UI5 & OData Basics	1.5 weeks
9	Debugging & Performance Tuning	1.5 weeks

PRACTICAL SKILLS

ABAP reports and debugging • Data Dictionary and internal tables • Enhancements/BAdIs • Integration and data transfer • Performance investigation

PROJECT / CAPSTONE

Build and debug a custom report + BAdI for an injected client requirement, with Jira sprints, code walkthrough and test/defect log.

LEARNING OUTCOMES

- Develop core ABAP programs.
- Work with enhancements and OO concepts.
- Understand integration/data transfer.
- Debug performance issues.
- Present a development solution.

POTENTIAL CAREER PATHS

SAP ABAP Developer • SAP Technical Consultant • SAP Development roles

THE 42X DIFFERENCE

A dedicated technical path going deeper than embedded debugging modules in functional SAP courses.
